使用注意事项 Usage Cautions

1. 关于本产品的应用, 请客户在选型产品时, 根据自己的具体使用条件和环境要求, 选择与之相匹配的产品, 其中未明确规定的要求条件, 请与奥凯联系, 以便获取更多的技术支持。

Regarding the application of this product, please select the matching product according to your specific use conditions and environmental requirements when selecting the product. If the requirements are not clearly specified, please contact AOKAI to obtain more technical support.

2. 安装使用本产品时, 无论接线还是固定安装, 均要求使用防松弹垫。

When installing and using this product, regardless of wiring or fixed installation, it is required to use anti-loose spring washers.

3. 安装紧固件的扭矩应在本规范要求的标准范围内, 扭矩低于扭矩最小值或超出扭矩最大值, 可能导致安装不牢固或破坏产品。

The torque for installing fasteners should be within the standard range required by this specification. It may cause the unstable installation or damaging the product if the torque is lower than the minimum torque or higher than the maximum torque.

4. 避免把本接触器安装在强磁场的地方 (如变压器或强磁铁处), 或靠近有热辐射的物体, 建议配合安装散热风扇使用。

Do not install the contactor in places with strong magnetic fields (such as transformers or strong magnets), or close to objects with thermal radiation. It is recommended to use it with a cooling fan.

5. 禁止在有油污的环境下使用该产品, 尤其是未接线前, 主端子被油污污染会严重影响导电性, 影响产品寿命。

It is forbidden to use the product in an environment with oil pollution, especially before wiring, it will seriously affect the main terminals conductivity if they are polluted by oil pollution, and affect the product life.

6. 禁止超出额定电寿命使用该产品, 额定电寿命到达时虽然产品还可以继续工作, 但有失效、爆炸、不断开引起燃烧的风险。

It is forbidden to use the product beyond the rated electrical life. When the rated electrical life is reached, although the product can continue to work, there is a risk of failure, explosion, and burning because of non-breaking.

7. 当主电路电压 $\geq 48V$ 时, 如果产品标签中有H符号出现, 表示主电路接线区分电流方向, “+”端或点有红漆的接线柱端必须连接电源 (电池) 的正极。

When the main circuit voltage is $\geq 48V$, if the H suffix appears on the product label, it means that the main circuit wiring has the current direction, and the “+” terminal or the terminal with red paint must be connected to the positive pole of the power supply (battery).

8. 该产品不能作为保护器使用, 使用时线路必须串联保护器。

This product cannot be used as a protector, and the circuit must be connected with a protector in series when using.

9. 奥凯仅做阻性电寿命验证和质量保证, 产品用于感性负载或容性负载的环境时, 建议回路并联浪涌保护装置。

AOKAI only does the resistive electrical life verification and quality assurance. When the product is used in an environment with inductive load or capacitive load, it is recommended that the circuit should be connected in parallel with a surge protection device.

10. 持续工作后, 断开后立即重启, 会因产品处于发热状态而影响吸合电压, 吸合电压会升高属合理现象。

After continuous work, restart immediately after disconnection, the pickup voltage will be affected due to the heating state of the product, and it is reasonable that the pickup voltage will increase.

11. 严禁带电接线。

It is strictly prohibited to wiring when power on.

12. 在接触器坠落的情况下 (高度 $\geq 30cm$), 原则上请不要再使用。

In principle, please do not use the contactor when it has dropped (height $\geq 30cm$).

13. 奥凯保留对产品更改的权利, 客户在首次下单之前应确认此规格书内容, 必要时可要求我司提供新的规格书。

AOKAI reserves the right to change the product. Customers should confirm the content of this specification before the first order, and can ask our company to provide a new specification if necessary.
